

Real Madrid – Project Part 1: Topic Selection

Website Name

Real Madrid Fan Page

Topic Description

The Real Madrid Fan Page is a football-focused website designed to showcase the history, achievements, and current updates of Real Madrid Club de Fútbol. The website allows fans to explore information about the club in a clean and easy-to-navigate layout. This project focuses on demonstrating fundamental web development skills including page navigation, client-side interactivity, and structured content presentation. The site will highlight club achievements, squad information, and recent news while providing fans with an engaging and visually appealing experience.

Pages

1. Home
2. History & Achievements
3. Squad
4. News & Matches
5. About / Fan Info

Data Storage, Manipulation, and Viewing

The website will store and display structured information related to Real Madrid, including player names, positions, achievements, trophies, and match updates. This data will be presented across multiple pages for users to view and navigate easily. Content such as squad details and recent news can be updated to reflect current information about the club. Any updates made will be reflected across the site to ensure accurate and up-to-date content for fans.
